

Technical Specifications for the MicroRT™ System

Length	1.5" (38 mm), compatible with 11-25 mm pin lengths
Diameter	0.080" +/- 0.004" (2 +/- 0.1 mm)
Wall Thickness	0.001" (25 µm)
Material	Poly(ethylene terephthalate)
Porosity	Water evaporation rate through wall at 22°C: roughly 80 micrograms/hour
Notes	Heat sealed at one end, optically clear, some small optical distortion due to small wall thickness variations around the circumference
